

You are a **Software Developer** and your life has hardly changed despite home office and avoiding contacts? You want change?

Perfect! We've got the right **Job** for you!

## Who are we?

ambeRoad is an Aachen based Start-Up focused on Business Intelligence. We are applying state-of-the art natural language processing and other machine learning techniques for intelligent search reranking, with a focus on company internal search tools.

## What are we looking for?

- ✓ Long term experience with **React, JavaScript, HTML, CSS**
- ✓ First contact with **SQL** and **NoSQL DB** Systems
- ✓ Skills in **Linux Bash** or **Windows Server Administration**
- ✓ Involvement in other large projects, especially with **GIT**
- ✓ Good to have: **Python, Django knowledge, Vue.js, C# Skills**

## Your Responsibility

For our latest project we are looking for support in our

## Front-End Team.

Your task will be the development and integration of components of the GUI and their connection to Back-End Databases. We are looking for 12-19 hours per week.

## What do we bring to the table?

- ✓ **Above average** pay (13-17 € / hour)
- ✓ **Credits** for Google Cloud even for private projects (GPU and TPU cluster access)
- ✓ Working in the **Digital Church Aachen**
- ✓ Participation in **Open-Source projects**
- ✓ Rapid **promotions** possible
- ✓ **Signing Bonus** of up to 500 €

## Sounds Interesting to you?

We do not need your CV, just write down some key points about your coolest project and why you would love to work for a startup company and send it to:

[the-next-jeff-dean@amberoad.de](mailto:the-next-jeff-dean@amberoad.de)

Or recommend someone you know and earn **100 €** if we hire them.
